

Principles of Biology Project

Section by Savannah Yates

Ms. Cain's (Biology 1) class is creating a group project based on the principles of biology. Each group of students chose a principle to research and got to decide how they would present their topic. Students had options such as PowerPoint, Children's Book, Movie, or even paint a ceiling tile. The class could research definitions, major science discoveries, scientists who were involved in the topic, timelines, and laws/theories. Students could include videos, drawings, photos, and even diagrams.

Q: Why did you choose your specific topic?

A: "I thought it would be cool to know how the body works." **-Alyssa McLeod** (9) (Homeostasis)

Q: Did you learn anything that surprised you or that was interesting?

A: "[That] Cells make more cells." **-Aaliyah Moore** (10) (Cell Theory)

Q: What way did you choose to present your project? And why?

A: "Children's book because I thought I would be good at putting the concepts in a way kids could understand." **-Emery Odom** (9) (Cell Theory)

Elementary students celebrate dot day

Section by Brianna Mason

Photo by Demarcus Green

Elementary students at BCS celebrated dot day on September 22. Dot day is based on a teacher who encourages a student to make her mark on the world and gives her confidence. It is a holiday that celebrates everyone's talents and embrace who they are as a person. It encourages everyone to love themselves.

The staff asked Rylynn Higginbotham if she liked dot day, "Yes". We also asked if she did any fun activities? "Yea, we put dots on a plate and coffee filters." In addition we asked why she decided to dress up for dot day? "Because I wanted to" Rylynn's favorite thing about dot day was "Decorating plates."
